### **California Pacific Medical Center Names New Vice President Medical Affairs**

SAN FRANCISCO, CA (September 29, 2006) -- California Pacific Medical Center is pleased to announce that Allan Pont, M.D., Chairman, Department of Medicine, has been appointed to the position of Vice President Medical Affairs (VPMA) effective October 1st, 2006.

Dr. Pont replaces Morris Flaum, M.D. who is now serving as the full-time CEO of the Physician Foundation at California Pacific Medical Center. Dr. Pont's new position means he will also be a member of the CPMC Executive Management Team.

In addition to serving as VPMA, Dr. Pont serves as the team physician with the Oakland A's baseball team, a role he has now held for 22 years.

Dr. Pont is a native of Montreal, Canada. He received his B.S. and M.D. degrees from McGill University in Montreal. He served his internship and residency at McGill, and later completed a subspecialty in endocrinology at Harvard University.

California Pacific Medical Center. Beyond Medicine.

*At San Francisco's California Pacific Medical Center, we believe in the power of medicine. We research the most up-to-date treatments, hire the most qualified individuals, and practice the most modern, innovative medicine available. We deliver the highest quality expert care with kindness and compassion in acute, post-acute and outpatient services, as well as preventive and complementary medicine. But we also believe that medicine alone is only part of the solution. That's why we look intently at each individual case and treat the whole person, not just the illness. It's why we go beyond medical care and provide our patients with things like disease counseling, family support, and wellness treatments. As one of California's largest private, community based, not-for-profit, teaching medical centers, and a Sutter Health affiliate, we are able to reach deep into our community to provide education, screening, and financial support in some of the city's most underserved neighborhoods. Because medicine can transform a body. But going beyond medicine can transform a life.*
