California Pacific Medical Center designates this educational activity for a maximum of 4.25 AMA PRA Category 1 Credits™. Physicians should only claim credit commensurate with the extent of their participation in the activity. This credit may also be applied to the CMA Certification in Continuing Medical Education.

Provider approved by the California Board of Registered Nursing, Provider #CEP 1956, for 5.4 BRN hours and 4.5 ANCC hours.

Beyond Medicine.

Why You Should Attend

This symposium will provide insight into the latest research and therapies from pediatric experts in the fields of cardiology, neurology, gastroenterology, endocrinology and hematology/oncology. Our specialists—whose tertiary care capabilities are not commonly found in Northern California—will provide updates to help you better understand conditions including autism, seizure disorders, metabolic syndrome, bleeding disorders and migraines. You will have an opportunity to meet and speak with our experts directly. Continuing education credits and a full breakfast and lunch will be provided.

Who Should Attend?

This course is designed for pediatric physicians, family practitioners and nurses who participate in the care and management of sick children.

Course Objectives

The symposium is designed to provide the most up-to-date information regarding numerous pediatric conditions. At the completion of the program, participants should be able to:

- 1 Identify necessity of stable intestinal bacteria as a key part of the development of a healthy immune system.
- 2 Discuss recognition of migraine variants and review classification of disorders.
- 3 Describe the classification of epilepsy and the approach and evaluation of seizure disorders.
- 4 Review process of evaluation and management of syncope in children and adolescents.
- 5 List conditions associated with autism and note the importance of identification and early surveillance.
- 6 Understand key areas during neonatal exam such as: early infection identification, changes in management of jaundice, cyanosis in the newborn and abdominal obstruction.

Agenda

7:30 A.M.	BREAKFAST
8:00 - 8:10	WELCOME Sandra Luna-Fineman, M.D.
8:10 - 8:40	MIGRAINES Farhad Sahebkar, M.D.
8:40 - 9:10	SEIZURE DISORDERS Farhad Sahebkar, M.D.
9:10 - 9:40	INTESTINAL BACTERIAL COLONIZATION AND THE DEVELOPMENT OF AUTOIMMUNE DISORDERS J. Antonio Quiros, M.D.
9:40 - 10:10	THROMBOPHILIA AND THROMBOSIS IN CHILDREN Louise Lo, M.D.

Medical Director, Pediatric Neurology
California Pacific Medical Center

Nikola Tede, M.D.

Pediatric Cardiology
California Pacific Medical Center

California Pacific Medical Center. Beyond Medicine.

California Pacific Medical Center has specialized in pediatric care for more than a century. Each year, about 8,500 children are admitted to our Well Baby Nursery, Pediatric Unit and Neonatal and Pediatric Intensive Care Units.

Our Pediatric Services provide children with specialized medical care in areas such as cardiology, neurology, hematology/oncology, diabetes, pulmonology and gastroenterology, among others. Our physicians work closely with other pediatric health care professionals and families to meet the needs of each child—from newborns to adolescents. Visit www.cpmc.org/pediatrics for more information.

At California Pacific Medical Center, we believe in the power of medicine. We research the most up-to-date treatments, hire and work with the most qualified individuals, and practice the most modern, innovative medicine available. We deliver the highest quality expert care with kindness and compassion in acute, post-acute and outpatient services, as well as preventive and complementary medicine. But we also believe that medicine alone is only part of the solution. That's why we look intently at each individual case and treat the whole person, not just the illness. Because medicine can transform a body. But going beyond medicine can transform a life.

This program is supported by educational grants provided by:
