

## What is an Abdominal Ultrasound?

An abdominal ultrasound (sonogram) uses reflected sound waves to produce images (pictures) of the abdomen (stomach) and internal organs. A sonographer performs an ultrasound examination. A transducer (a small, hand-held device that looks like a microphone) is placed over the area to be examined and records images electronically. Ultrasound images of the abdomen show organs like the gallbladder, spleen, pancreas, kidneys, liver and bile ducts as well as blood flow to the organs. Ultrasound does not use X-ray or other types of radiation.

## How Do I Schedule My Abdominal Ultrasound?

Call (415) 600-6800 to schedule your ultrasound.

## How Do I Prepare for an Abdominal Ultrasound?

- **Do not to eat or drink for 6 hours before your ultrasound examination.**  
**Note:** This means no water, coffee, chewing gum, or candy.
- Avoid smoking before the examination.
- Be sure to bring the referral form from your doctor and your insurance card with you to the appointment.

## Where Do I Go for My Abdominal Ultrasound?

Ultrasound campus locations are:

<b><u>Pacific Campus</u></b>	<b><u>California Campus</u></b>	<b><u>Davies Campus</u></b>
Phone: (415) 600-3232 2333 Buchanan Street 2 <sup>nd</sup> Floor, Radiology	Phone: (415) 600-0800 3700 California Street Lobby Level	Phone: (415) 600-6180 Castro & Duboce Streets North Tower (Level A)
<b><u>Parking:</u></b> 2405 Clay St. at Webster St.	<b><u>Parking:</u></b> 460 Cherry St. at California St. and 3838 California St.	<b><u>Parking:</u></b> 45 Castro St. at Duboce St.

## What Will I Experience During an Abdominal Ultrasound?

- Ultrasound imaging of the abdomen is painless, fast, and easy.
- You change into a gown for this test. The examination takes about 30 minutes.
- You are positioned on your back on a firm table in the Radiology department. Pillows are provided for your comfort.
- First, the sonographer applies a warm, clear gel on your abdomen to help the transducer make direct contact with the skin.
- Next, the sonographer places the transducer firmly against your skin, and moves it back and forth to see the images of your abdomen on the screen.
- There may be mild discomfort from pressure as the sonographer moves the transducer over your abdomen, especially if you are having abdominal pain.
- After the exam, the sonographer reviews the ultrasound images with a radiologist.

## What Can I Expect After an Abdominal Ultrasound Exam?

There are no restrictions on what you eat (your diet) or your activity, unless your doctor tells you otherwise.

## How Do I Get the Results?

A radiologist sends a signed report to your doctor. Be sure to tell the sonographer if you would like any other doctors to get a copy of the report. Your doctor's office tells you how to get your results.
