**ALERT!!!! CPMC Computer Data Center is moving in May!!**

We are excited to announce this month that CPMC IT Administration has secured a new home for our secondary computer data center. In addition to many other functions, the secondary data center is used to store all of the images for the three picture archival and communications systems (PACS)- which includes HEARTLAB. The CPMC IT team is busy preparing the new space and we do not have a firm move date yet. However, we do know the move will be sometime in May, so please be on the lookout for an announcement in April. The move will require some disruption in access to the HeartLab long-term archive, at all campuses but every effort will be taken to limit this disruption. More information is forthcoming. If questions, please contact Robert Lee- 600-3473.
